PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience building production-grade web applications using React.js, Node.js, Next.js, and PostgreSQL. Proficient in RESTful API design, responsive UI development, and cloud deployment on AWS. Adept at the full software development lifecycle — from requirement analysis and UI/UX prototyping in Figma to CI/CD and database optimization. Passionate about clean code, performance, and delivering real-world impact through technology. Actively seeking internship or entry-level full stack roles.

TECHNICAL SKILLS

Frontend	React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Responsive Design, Figma
Backend	Node.js, Express.js, REST API Design, JWT Authentication, Middleware, MVC Architecture
Databases	PostgreSQL, MySQL, MS SQL Server, ORM (Sequelize / Prisma), Database Design, Indexing
Languages	JavaScript (ES6+), TypeScript, Python, Java, C++, PHP
DevOps & Cloud	AWS (EC2, S3), Git, GitHub, GitHub Actions (CI/CD), Vercel, Netlify, Docker
Testing	Jest, Postman (API Testing), Manual QA
IoT	Arduino, ESP32, Sensor Integration, Real-time Data Monitoring
Design Tools	Adobe Photoshop, Adobe Illustrator, Figma, Rapid Prototyping

PROJECTS

CHETNA – Smart Women Safety & Emergency Response System

Tech Stack: React Native (Expo), Node.js, Express.js, PostgreSQL, Prisma, SQLite, Socket.IO, OpenStreetMap

- Built a women safety platform featuring One-Tap/Voice SOS, offline crime-zone detection, GPS tracking, parent linking, and verified Secret Cop emergency response.
- Implemented real-time SOS communication with Socket.IO and offline-first geofencing using SQLite to provide safety alerts during limited connectivity.
- Developed Guardian Timer, shake detection, evidence collection, and safe-route navigation using Node.js, PostgreSQL, OSRM, and OpenStreetMap.

ZenTracker – Goal Tracking System

[Live Demo ↗](#)

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, JWT Auth, Tailwind CSS

- Built a full-stack goal tracking web app with user authentication, real-time progress dashboards, and streak tracking
- Tested REST API endpoints with Postman and wrote Jest test cases to catch regressions before deployment

- Designed RESTful APIs with Express.js and secured endpoints using JWT-based authentication middleware
- Implemented and manually tested PostgreSQL schema across user, goal, and progress-log flows; verified data integrity and query performance
- Deployed frontend on Vercel and backend on AWS EC2 with environment-based configuration

PortGen – Developer Portfolio Generator

[Live Demo ↗](#)

Tech Stack: Next.js, React.js, Tailwind CSS, Vercel

- Built a dynamic portfolio generator enabling developers to create, preview, and export portfolios in under 5 minutes
- Performed usability and cross-device testing to ensure consistent rendering and export behavior
- Engineered a real-time template engine with live preview using React state management and component-driven architecture
- Utilized Next.js SSR for improved SEO and faster initial load times

Smart Helmet – IoT Safety System

 1st Prize – College Exhibition

Tech Stack: Arduino, ESP32, Sensors, Python

- Engineered a smart safety helmet with integrated alcohol detection, fall detection, and emergency alert sensors
- Manually tested sensor accuracy and alert triggers under varied real-world conditions before the exhibition demo
- Developed real-time data pipeline to transmit sensor readings via Wi-Fi (ESP32) to a web dashboard
- Won 1st Prize at college technical exhibition, recognized for innovation and practical impact
- Leveraged Chrome's declarativeNetRequest API for efficient, low-overhead URL filtering and redirect handling

EDUCATION

Bachelor of Computer Science

2024 – Present

S.P.K College, Sawantwadi (Autonomous)

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Web Technologies, Computer Networks, Software Engineering

ACHIEVEMENTS & CERTIFICATIONS

-  1st Place – Smart Helmet Project, College Technical Exhibition
-  2nd Place – Web Development Competition
- Completed: Responsive Web Design
- Completed: JavaScript Algorithms and Data Structures

INTERESTS & AVAILABILITY

Full Stack Web Development • IoT Systems • UI/UX Design • Data Analysis • Open Source Contribution

Open to: Internships • Freelance projects • Entry-level Full Stack / Backend / Frontend roles
